

Payaccsys Predefined Beneficiary List

Disclaimer: Whilst we endeavour to keep the information in this table up to date and correct, Payaccsys Services Ltd makes no representations or warranties of any kind, express or implied about the completeness, accuracy, reliability, suitability or availability with respect to the information in the table provided for any purpose. Any reliance you place on such material or information is therefore strictly at your own risk. Furthermore, Payaccsys Services Ltd, its sub-contractors, officers, directors, employees, agents and independent contractors shall not be liable to you, the Client, or any Third Party for any loss, liability, damage, expense (whether direct or indirect, consequential, special, general or otherwise and whether for loss of profits, revenue, data or goodwill) which may be suffered by you, the Client, or such Third Party as a result of or which may be attributable, directly or indirectly to the use of the Predefined Beneficiary payment service.

Additional Information: It has become quite a trend for companies or institutions to acquire a pre-defined short code from a bank for payments. There are various reasons for this, the main one being to avoid fraud and the second important one is to ensure fast allocation of payments to client accounts. We are sure that you have encountered this when making payments via your own online banking platform. As their client, all you have to do is enter the correct reference number and the transaction is timeously processed.

Payaccsys Online used to make payments to the normal bank account numbers of these companies and institutions, regardless of whether they had a pre-defined short code listing as well. If a client had the bank account number, a transaction would be successfully processed. Banks however are becoming increasingly strict and some of these bank account numbers have now been blocked permanently. The result is that now these previous payments to the account number itself, which is made via our banking services, fails. This means that our clients now have to make use of the pre-defined short code for the transaction to be successful. Payaccsys, like we always do, try to keep up with the changes in the industry and we are happy to announce that our clients can now make payments to pre-defined beneficiaries making use of Payaccsys Online.

The process is rather painless. If you make use of your own file format then all you have to do is replace the account number and branch code with the correct pre-defined short code in your file (they will be the same number) and ensure that correct reference number is entered. (None of the fields should ever exceed 16 characters)

If you would like to make use of our format then you can populate your spreadsheet as follows:

A=Ref (Customer code or Own Reference)

B=Name (Creditor Name)

C=Amount (Nett. Amount, no comma for cents) use a full stop

D=Account No. (Short Code)

E=Branch Code (Short Code)

F=Ref (Reference to reflect on Beneficiary Bank Statement)

G=Email Address (Email notification will be sent to beneficiary to notify payment instruction)

None of these fields should exceed 16 characters and all data must all be formatted as text.

Save file as *.CSV with no commas or special characters in text, ONE header and NO footer (NO TOTALS).

Format cells to "text" before save as *.CSV.

DO NOT OPEN THE *.CSV FILE AGAIN AFTER SAVED (Excel will add formatting to this *.csv file when opened like dropping zeros etc. and it can alter data)

An example of your header rows:

No.

Name

Amount

Acc No

BR Code

Reference

Email

Remember to contact us so we can activate the file format MAINCSV on your profile.

Please note the following (for both of the options listed above):

- When loading your file always select creditor file. This will ensure that when the file is processed that the correct reference is used. When you select Payroll your company name will be the reference and this will result in the file rejecting.
- Please do not drag the columns that remains the same as this could result in the fields incrementing and inevitably changing the pre-defined short code. Rather copy and paste to ensure that it remains the same.

If ever in doubt, please do not hesitate to contact us on **0836071515**
